Subject: Certification of Carbon Neutrality Target and Alignment with Oman Vision 2040

Dear Esteemed Colleagues,

I am writing to formally inform you that MCBS has set 2030 as the target year to achieve carbon neutrality for Scope 1, 2, and partial Scope 3 emissions. This commitment is an essential milestone in our ongoing efforts to reduce our environmental footprint and contribute to global climate change mitigation.

In alignment with the goals outlined in Oman Vision 2040, MCBS is dedicated to supporting the Sultanate's journey toward a low-carbon and sustainable economy by 2050. One of the key objectives of this vision is to reduce carbon emissions by 21% by 2030, using 2020 as the baseline year. We are proud that our college's carbon neutrality target mirrors this national goal, and we are determined to take the necessary steps and implement initiatives to meet both our internal carbon reduction objectives and the broader national emissions reduction targets.

As we move forward with this important initiative, MCBS will continue to collaborate closely with all departments, faculties, and stakeholders to incorporate sustainability practices across our operations, curriculum, and research.

We are deeply grateful for your continued support in this vital endeavor and look forward to working together toward a sustainable future.

Sincerely,

Dr. Moosa Al Kindi  
Dean
