

Services Provided for Students with Disabilities

The Modern College of Business and Science (MCBS) is dedicated to ensuring an inclusive and supportive environment for students with disabilities. The college provides a range of services to address their unique needs and ensure their comfort and accessibility on campus.

One of the key services offered is the provision of dedicated parking spaces close to the main entrance, ensuring convenient access to the campus. Additionally, the college has accessible restrooms designed specifically for students with disabilities. When visiting college departments to complete administrative tasks, students with disabilities are given priority service to expedite their processes.

MCBS also supports students with cognitive disabilities. Learning disabled students receive extended examination periods because the institution gives them an additional twenty minutes beyond their scheduled test time. To maintain student focus during their examinations MCBS provides students with separate rooms where they can complete their finals. Bilingual instructors who speak both Arabic and English will read exam questions to students who require help.

Moreover, the Foundation Department at MCBS took the initiative to assist students facing difficulties in reading by translating study materials. This initiative has helped many students understand the content of their courses. Additionally, the college has provided special computers to blind students, ensuring their full participation in academic activities.

Staff stands ready to help students with disabilities anytime during their presence on campus. Students with disabilities are given priority access to college facilities including elevators which helps improve their overall experience on campus.
